

MACKENZIE CREEPING BENTGRASS

BENEFITS

- Superior Turf Quality
- Lateral Spread for Recovery
- Cold and Hot Temperature Growth
- Excellent Disease Resistance

Mackenzie Creeping bentgrass has great lateral spread with high density but low organic matter production. Rapid recovery from wear, divots, verticutting, aerification, and ballmarks. Cool temperature growth and density to prevent Poa annua invasion. Heat, cold, disease, and shade resistant.

PLANTING & MAINTENANCE

SEEDING RATE1-3 LBS PER 1000FT²

GERMINATION5-10 DAYS

MOWING FREQUENCY.....3-7 TIME(S) PER WEEK

NITROGEN REQUIRED.....LOW

ENDOPHYTE ENHANCED.....NO

RATINGS

Poor-----Excellent
